Act Report

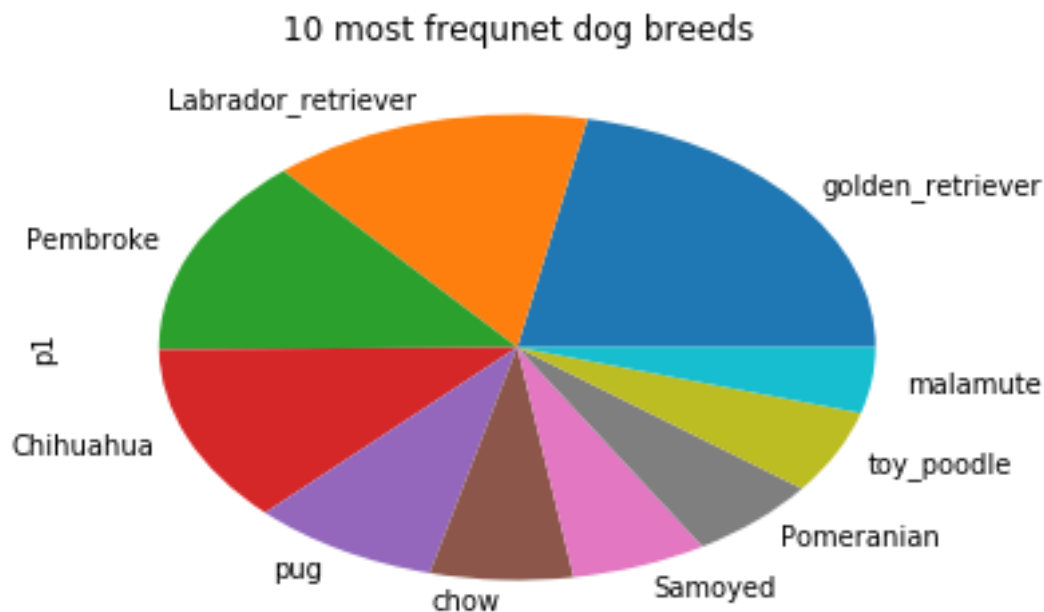

Name: Abdulaziz AlOmar

Why could be better than analyzing Real-world data about cute puppies, the journey of wrangling and visualizing couldn't be more intriguing thus We hope you found our findings from this data as fascinating as we found it due to be.

Here are Some of interesting insights from the data:

Beginning with the most frequent dog breads in our dataset:

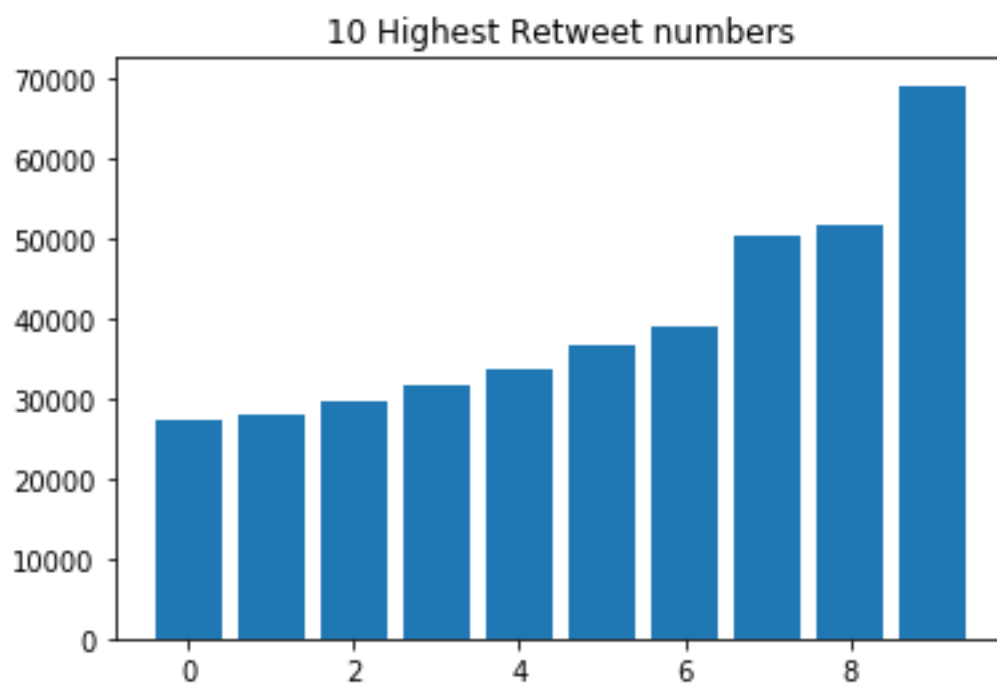

According to the pie chart above the 3 most frequent dog:

- 1-Golden Retriever
- 2-Labrador Retriever
- 3-Pembroke

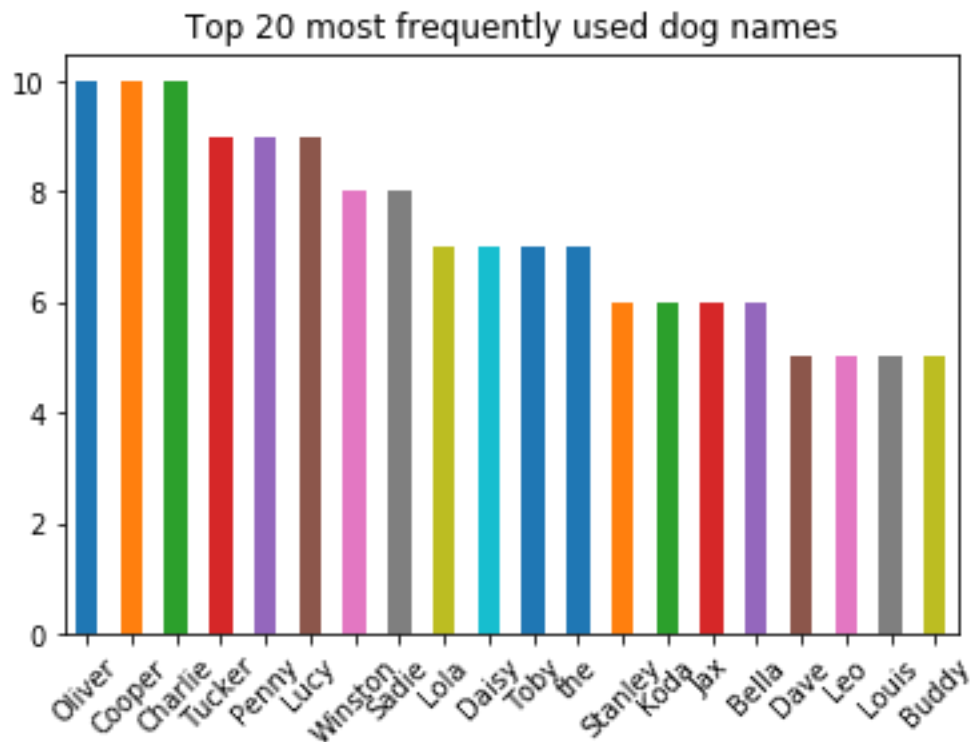

Here we can the 10 Highest Retweet numbers:

These Bar chart does provide a strong argument WeRateDogs was not only famous but getting some really high numbers

After we saw the top 10 most common dog breeds, we said to ourselves why not check the most frequently used names:

According to this plot Oliver and Cooper and Charlie are all the most common names and they all tied at number one and we can see a similar pattern to the other names in the top 20.

Lastly by visualizing the sources, we can confirm an already famous fact that most twitter users are using the App corresponding to their smartphone and intriguing how in our data we only found user with an iPhone specifically, and not a single android user.
